

Facebook Page Guide (Taglish) — Existing Page

Para sa: video tutorial (isa-isang step)

Assumption: may existing Facebook Page ka na

Note: Sample pictures lang ito (mockup). Pwede magiba ang exact labels sa Facebook UI, pero pareho ang landmarks (profile switcher, Edit Page info, Settings, Page access, Page setup).

Paano gamitin sa video

Segment	Ano i-record
Intro (10–15s)	“May existing Page tayo — ituturo ko kung saan makikita, maglalagay ng details, magdadagdag ng authority, at magpapalit ng name.”
Per step	Screen recording + picture sa guide bilang B-roll / thumbnail
Outro	Checklist + reminder: Full control lang ang pwedeng mag-change ng name at mag-add ng access

Quick map (buod)

1. Hanapin at i-switch ang Page
2. Buksan ang **Edit Page info**
3. I-fill out ang details (About / contact / address)
4. Mag-add ng **authority** (Page access)
5. Palitan ang **Page name** (kung kailangan)
6. Bonus: photo, username, CTA button, privacy

STEP 1 — Saan mo makikita ang Page mo?

Ano gagawin

1. Mag-login sa Facebook gamit ang personal account mo (desktop recommended).
2. I-click ang **profile photo** mo sa **kanan itaas**.
3. I-click ang **See all profiles**.
4. Piliin ang **Page** mo sa listahan.
5. Kapag napili, mag-switch ang buong Facebook papunta sa **Page profile** (hindi na personal account ang “nagsasalita”).

Alternatibong daan

- Sa left menu / shortcuts, hanapin ang **Pages**, then open your Page.
- O i-type sa search bar ang exact Page name.

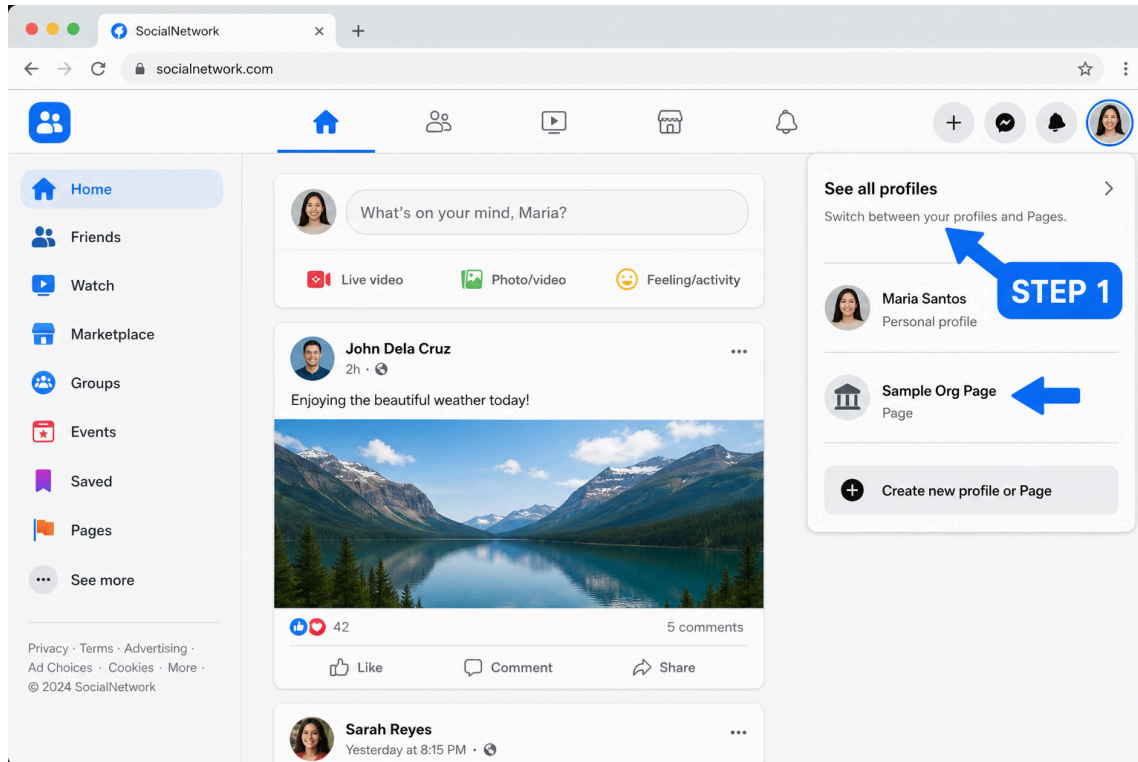

Ano i-show sa screen

Profile menu → **See all profiles** → click your Page.

Sample script (Taglish)

“Una, hanapin natin yung Page. Click lang yung profile photo sa taas, then **See all profiles**. Dito lalabas yung Page mo — click mo para mag-switch.”

Picture (reference)

Video tip: Mag-pause ng 2 segundos habang naka-highlight ang Page name sa list.

STEP 2 — I-switch muna bago mag-edit

Bakit importante

Maraming settings **hindi lalabas** kung personal account ka pa. Kailangan **naka-switch ka as the Page**.

Paano malalaman na naka-switch ka na

- Profile photo sa kanan itaas = **logo / avatar ng Page**
- Name sa top = **Page name**, hindi personal name
- Kapag magpo-post, as the Page ka magpo-post

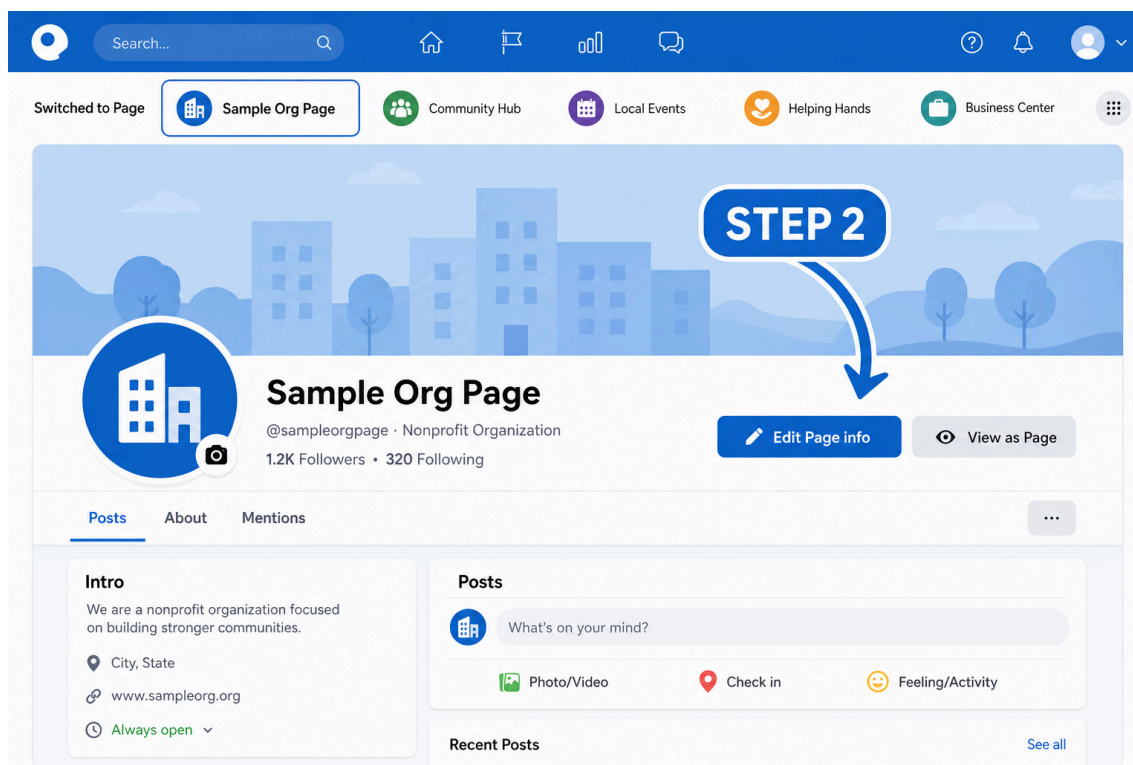

Ano i-show

Before/after: personal avatar → Page avatar.

Sample script

*"Important: bago tayo mag-edit, siguraduhing **naka-switch tayo as the Page**. Kung personal account pa, hindi complete yung options."*

Picture (reference)

STEP 3 — Saan maglalagay ng details (Page info)?

Ano gagawin

1. Habang naka-switch as Page, pumunta sa Page mo (Feed / profile ng Page).
2. Hanapin ang button na **Edit Page info** (malapit sa cover photo), o
3. Pumunta sa tab / section na **About**, then **Edit**.
4. I-update ang details:

Field	Ano ilalagay (example)
Category	Organization / Education / Community, etc.
Phone	Landline o mobile ng office
Email	Official email (hindi personal kung possible)
Website	Official site o link
Address	Physical address kung may office
Hours	Open hours (kung applicable)
Description / Bio	Short intro kung ano ang Page

5. I-save / Confirm.

Via Settings (alternate)

1. Click Page photo (kanan itaas) → **Settings & privacy** → **Settings**

2. Hanapin **Page setup** / Page info
3. I-edit ang fields doon

Ano i-show

Edit Page info form — category, contact, address, hours.

Sample script

*“Para sa details: click **Edit Page info**. Dito mo ilalagay yung category, phone, email, website, address, at short description. Completein niyo ito para madaling mahanap at magtiwala ang audience.”*

Picture (reference)

The screenshot shows the 'Edit Page info' form in Facebook's Page Settings. On the left is a sidebar with navigation options: General, Messaging, Notifications, Page info (highlighted), Roles, Privacy, Templates, and Linked Accounts. The main area contains the 'Edit Page info' form with the following fields: Category (dropdown menu set to 'Local Business'), Phone (text input with '(555) 123-4567'), Email (text input with 'hello@yourbusiness.com'), Website (text input with 'https://www.yourbusiness.com'), Address (text input with '123 Main St, Springfield, IL 62701'), and Hours (dropdown menu set to 'Mon - Fri: 9:00 AM - 5:00 PM'). A blue 'Save' button is at the bottom of the form. A blue callout bubble with the text 'STEP 3' and radiating lines points to the form.

Video tip: Mag-scroll slow sa form. Fill out 1–2 sample fields live.

STEP 4 — Saan magdadagdag ng authority (Page access)?

Maikling explanation (bago mag-demo)

Sa New Pages Experience, hindi na “Admin / Editor / Moderator” ang labels. Ngayon:

Type	Meaning (simple)
Facebook access — Full control	Parang Admin . Pwedeng mag-manage ng settings, mag-add/remove ng tao, even delete the Page.
Facebook access — Partial control	Pwedeng mag-manage as Page, pero limited sa settings/access.

Task access	Para sa specific tasks (content, ads, insights) via Meta Business Suite — hindi sila fully “switch into” the Page tulad ng Facebook access.
--------------------	--

Reminder: Ikaw dapat may **Full control** para makapag-add ng iba.

Ano gagawin

1. Switch into your Page.
2. Click Page photo (kanan itaas) → **Settings & privacy** → **Settings**.
3. Sa left side, hanapin **Page access** (minsan under New Pages Experience).
4. Under **People with Facebook access**, click **Add New**.
5. Search by **name** o **email** ng Facebook account nila.
6. Decide:
 - Full control ON = trusted co-admin only
 - Full control OFF = partial control
7. Click **Give Access** → enter password → Confirm.
8. Sabihin sa tao na **i-accept** ang invitation (Notifications).

Para sa Task access

Sa same **Page access** screen → **People with task access** → **Add New** → piliin kung ano ang pwedeng i-manage (content, messages, ads, insights, etc.).

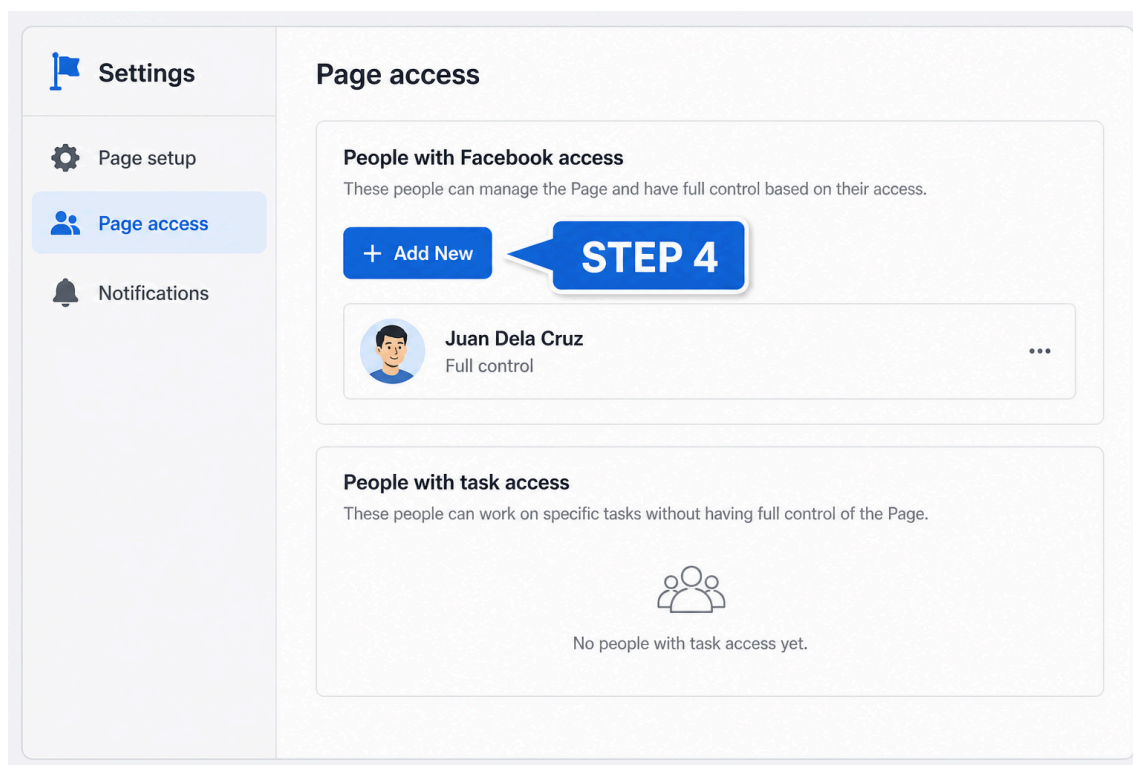

Ano i-show

Settings → Page access → Add New → Full control toggle.

Sample script

*“Para magdagdag ng authority: Settings → **Page access**. Dito may **Facebook access** at **Task access**. Kung gusto mong full admin-level, i-on ang **Full control** — pero ingat, kasi same power nila sayo. Pagkatapos, kailangan i-accept nila yung invite.”*

Picture (reference)

Safety tip (sabihin on cam): Huwag magbigay ng Full control sa random / bagong kakilala.

STEP 5 — Saan magpapalit ng Page name?

Ano gagawin

1. Switch into your Page (Full control required).
2. Page photo → **Settings & privacy** → **Settings**.
3. Click **Page setup**.
4. Click **Name** (or Edit beside Name).
5. Under General Page Settings, **Edit** beside your Page name.
6. Type new name → **Review Change**.
7. Enter password → **Request Change**.
8. Maghintay ng review (minsan hours, minsan hanggang ~3 days).

Important notes

- **Name ≠ Username.** Pag palit ng name, **hindi automatic** nagbabago ang @username / URL.
- Malaking rebrand = mas matagal ang review; minsan may documentation request.
- May cooldown minsan bago ka pwedeng magbago ulit — double-check spelling.

Ano i-show

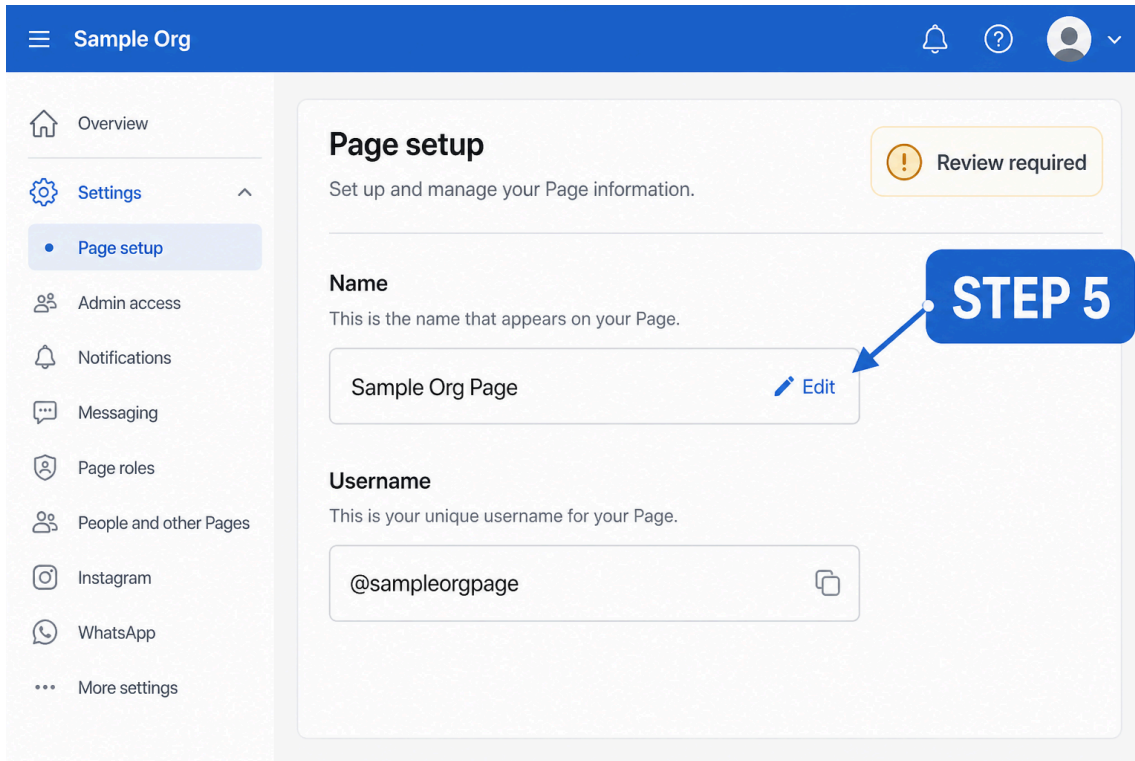

Page setup → Name → Edit → Review Change.

Sample script

*"Kung gusto mong palitan ang Page name: Settings → **Page setup** → **Name** → Edit. I-type ang bagong name, then **Review Change**. May review si Facebook, so hindi instant always. Tandaan: pag palit ng name, hindi automatic*

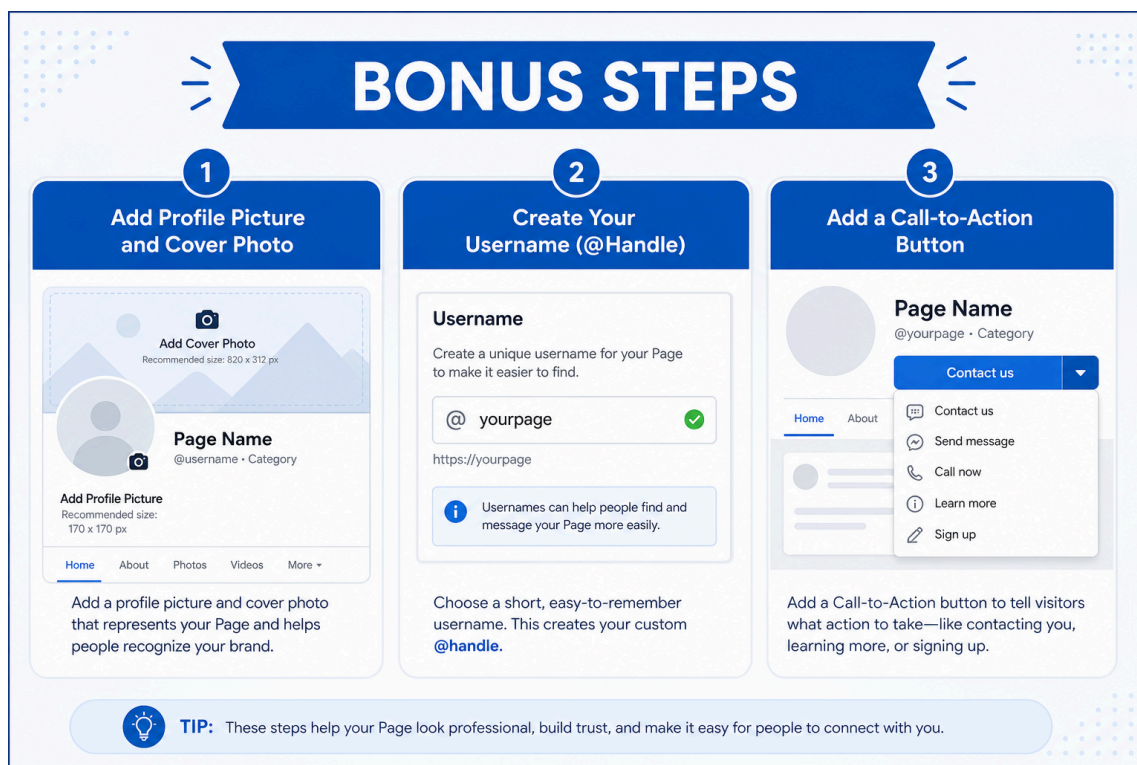

napapalitan ang username.”

Picture (reference)

STEP 6 — Bonus extras (dagdag value sa video)

Picture (overview)

6A. Profile picture + Cover photo

1. Habang as Page, open your Page profile.
2. Click camera / edit icon sa profile picture → Upload.
3. Same sa cover photo.
4. Use clear logo + readable cover (brand + short tagline).

Script: "Update din ang profile at cover photo — first impression ito kapag naghahanap ang tao."

6B. Username (@handle) / web address

1. Settings → **Page setup** → **Name** / Username section.
2. **Edit** beside username.
3. Choose available @yourpage (usually desktop only).
4. Save.

Script: "Username ang @handle at facebook.com/username — mas madaling i-share kaysa long link."

6C. Call-to-action (CTA) button

1. On your Page profile, look for **Add a button** / edit action button.
2. Choose: Contact us, Learn more, Sign up, Call now, etc.
3. Link to website / form / Messenger / phone.
4. Save.

Script: "Lagyan ng CTA button para one-click ang next action — call, website, o message."

6D. Who can post / privacy basics

1. Settings → look for **Audience and visibility** / Page moderation / posting permissions.
2. Decide kung public followers lang ba ang pwedeng mag-post sa Page, o admin-only posts.

3. Review blocked words / messaging settings if needed.

Script: "I-check din kung sino pwedeng mag-post o mag-message — para controlled ang Page."

6E. Meta Business Suite shortcut (optional clip)

- Pumunta sa business.facebook.com
- Select your Page (top-left selector)
- Settings → Page info / access — useful kung hindi makita ang option sa regular Facebook UI

Script: "Kung kulang ang option sa Facebook, subukan ang Meta Business Suite — same Page, mas complete ang tools."

Video checklist (bago mag-upload)

- ☐ Step 1: Show See all profiles → select Page
- ☐ Step 2: Confirm naka-switch as Page
- ☐ Step 3: Edit Page info (fill 2–3 fields live)
- ☐ Step 4: Page access → explain Full vs Task access
- ☐ Step 5: Page setup → Name change + review note
- ☐ Bonus: photo / username / CTA (kahit short)
- ☐ Outro: "Full control = careful; accept invite; name ≠ username"

Troubleshooting (mabilis)

Problema	Try this
Walang Edit / walang Page access	Hindi ka naka-switch as Page, o wala kang Full control
Hindi makapag-change ng name	Task access lang ang role mo; kailangan Facebook access with Full control
Hindi makita ang Page sa list	Search the Page name, or check if you're logged into the correct personal account that manages it
Invite hindi natanggap	Sabihin sa tao i-check Notifications / email; re-send access if needed
UI iba sa video	Normal — Meta updates UI; sundin ang keywords: See all profiles, Edit Page info, Page access, Page setup
